

## MAXIMIZING CARE WHILE MINIMIZING COSTS

The Allegiance Care Management case management program utilizes early intervention and acute case management to effectively coordinate and manage your group's most medically challenging cases. These interventions utilize unique resources for creative approaches to maximize appropriate, cost-effective care.

Allegiance case managers are registered nurses who work one-on-one with members identified as at-risk who would benefit from case management services. Our team approach ensures a registered nurse works closely with the member, member's family, facility, health providers and appropriate community resources.

### PROGRAM HIGHLIGHTS

- ✓ Our integrated interdisciplinary risk management team works together to coordinate and communicate all issues surrounding our clients' high-risk cases.
- ✓ Our fully unified team approach eases the burden of healthcare expenses for employer groups while ensuring plan members receive optimum care.
- ✓ Dedicated case managers connect with our members and their families, maintaining an ongoing relationship with the participant.
- ✓ Continued collaboration throughout the member's treatment, including ongoing assessments of the interventions related to the plan of care, ensuring that all members receive the right care at the right time to achieve the best possible outcomes.
