

This reference list divides medications into URX's value based drug classifications, A through F, arranged by major therapeutic classes. This list is not all-inclusive, nor does it guarantee coverage. Changes to the medications list can occur during the plan year and you are encouraged to ask your pharmacist to verify the current copay amount at the time your prescription is filled.

Present this Drug Key guide during your next physician visit if a prescription is needed.

If you need additional information regarding your prescription benefit, please contact URX customer service at 1-888-648-6764 or visit our web site at www.urx.mt.gov for a complete listing of all medications and their classification.

Edits Key **Edits reflect movement from one Drug Class to another when certain pre-defined criteria are met**

PA: Prior Authorization is required to ensure clinical appropriateness of this therapy. If medically necessary, claims may be moved to an enhanced benefit tier. Call 1-877-501-1064 for assistance.

ST: Step Therapy protocol is in place to electronically verify prior pharmacy claims. If first level therapies are on record, patients may be moved to an enhanced benefit tier. Call 1-877-501-1064 for assistance.

PE: Plan Exceptions will coordinate plan members into appropriate disease management programs, or to review the unique nature of an individual plan member's tolerance of a preferred drug class. Call your benefits plan for assistance.

QL: Quantity Limit is in place to ensure appropriate use. Coverage may be limited to specific quantities per prescription and/or time period

GF: Continuation, or Grandfathering, of a plan member's present drug regimen onto the URX formulary. New plan members utilize the standard URX drug classification. Call 1-888-5-ASK-URX (1-888-527-5879) for assistance.

SPECIALTY DRUGS:

Specialty drugs are defined as high cost prescription drugs that may require special handling and/or administration to treat chronic, complex conditions. These drugs may be taken orally but often are injectables with complex manufacturing process or may be limited distribution status.

The URx Specialty Drug program offers a variety of medications at **\$0 copay**. This \$0 specialty program includes medications to treat Hemophilia, Hepatitis C, Arthritis, Multiple Sclerosis, Osteoporosis, Pulmonary Arterial Hypertension, as well as medications for Oncology and Transplant patients. Other Specialty Drugs are available through the URx specialty program with a \$150 copay.

If members prefer to receive specialty drugs at retail pharmacies (if available), then the copay is 50% of the total cost of the drug.

Some drugs are limited distribution drugs and may not be available at Diplomat. For these prescriptions, Diplomat will transfer them to specialty pharmacies that are able to dispense these drugs.

Because of the complexity of the medical condition, many of these drugs will require PA to ensure appropriate use and to maximize the effectiveness of the drug by encouraging careful adherence to treatment protocols.

Diplomat Specialty Pharmacy is the chosen provider for specialty drug services. To enroll or for any questions regarding the specialty drug program, please contact Diplomat at **1-877-319-6337**.
